BRIARPATCH “HITS THE JACKPOT” WITH NEW JACKPOT GAME!

CREATE OR SPOT SEQUENCES AND EXCLAIM JACKPOT!

Millburn, NJ (April 2, 2007) -- Adults know the thrill of watching three spinning reels of colorful fruit slowly line up to form a Jackpot. Briarpatch, award-winning game makers of family fun, brings all the color and excitement to the kitchen table with its newest board game... Jackpot! The game may be flashy, but true to the Briarpatch mission, it is also developmental.

“Can you beat the odds?” asks George Schimpf, VP of Marketing at Briarpatch. “The game develops the sequencing skills and observation skills that will make you a better chess player!”

Created for 2 to 4 players, Jackpot! is a game of sequencing, logic and luck. The Jackpot game board features 9 squares covered by 8 bright fruit tiles -- leaving one blank space. Each player is dealt 6 cards showing fruit patterns. The object is to turn over one of your cards and create the pattern in as few moves as possible. A roll of the die determines the number of moves that you can make before going over “par” and having to add cards to your hand. Can you beat the odds? Create the pattern in fewer moves and discard cards. Be careful because your move may cause your opponent to spot a winning combination first and call out Jackpot! The first player to get rid of all his or her cards wins!

Jackpot! requires no reading skills and is a perfect multi-generational game for grandparents and parents to enjoy with the youngest members of the family. A complete set of rules and examples are enclosed.

Jackpot! will be on shelves in Spring 2007 with a retail price of \$12.99.
